Jackassical

Editor, The Arizona Republic:

A great many people are astonished by your amazing request in your editorial of Oct. 9, asking the people of Arizona to extend Western hospitality to the proposed visit of the Russian editors, who are in fact agents, observers and spies of the Soviet. You seem to expect approval of the jackassical plan of a number of misinformed midget minds to show these cut-throats and saboteurs our state, valley and city with all its vital installation, topping it all with a plane trip to the Grand Canyon in order that they may get a better view from air.

It behooves the thinking people of this state to follow the example of Canada and protest so vigorously to the proposed trip to our state, that it will be cancelled. Public officials should use their influence to achieve this result.

You note that Allen Dulles, head of the Central Intelligence Agency, states definitely that the Russian pattern has not changed. Let these people who are enthusiastic about doing something, spend their time in aiding to build a stronger and bigger civil defense.
